The **Software REVUELTA SIP** is a powerful tool that smartly collects, compares, manages, and uses the generated data from almost any **REVUELTA** Scale connected to a PC through the Digital Indicator's serial port. Additionally, it can operate and control peripheral devices connected to the Scale to complement the weighing process, making it more agile and secure.

Based on a high-end relational data access declarative language, along with a **Structured Query Language (SQL)**, the Software can perform diverse arithmetic operations, unit conversions, reports of all the operations and transactions performed with the Scale, and data transfers with administrative and control purposes, ensuring a high security on the way data is managed.

Example of Software Revuelta SIP's operation with CAI System (optional)

The Software not only has a user-friendly data entry for all of the information it can handle, but also lets the Administrator assign who and what the users have access to, such as product lists, reports, weight input, or settings.

REVUELTA SIP[®] is designed as flexible as possible, allowing the user to customize the data entries, reports and notifications in order to adapt the operations to the particular working process of every company.

Fecha	hora	Usuario	Producto	Peso	Tara	Neto	Estado	Nota	Detalle
29/06/2016	01:12	JORGE GONZALEZ	SULFATO DE AMONIO	16360	16360	0	OK		
29/06/2016	05:37	JORGE GONZALEZ	SULFATO DE AMONIO	41660	16360	25300	OK		

REVUELTA SIP[®] is able to operate in different workstations connected to the database without compromising the operation process, transaction records or scheduled tasks

Using communication protocols and data exchange standards, the Software lets developers have access to predefined database records through web services. The Software is able to manage the reception and dispatch of vehicles and merchandise, storing all the desired information which can be later used to generate reports, print tickets and shipping orders, send emails, and have access to specific data from anywhere through the web services provided by the Software.

Customizable Web Services for a compatible connectivity with Enterprise Resource Planning software

Customizable Tickets, Inquiries and Additional fields

SQL Database compatible with ERP systems and own applications

Send operations via email

High security in each process by defining each user's tasks

Register and convert each operation to a desired measurement unit

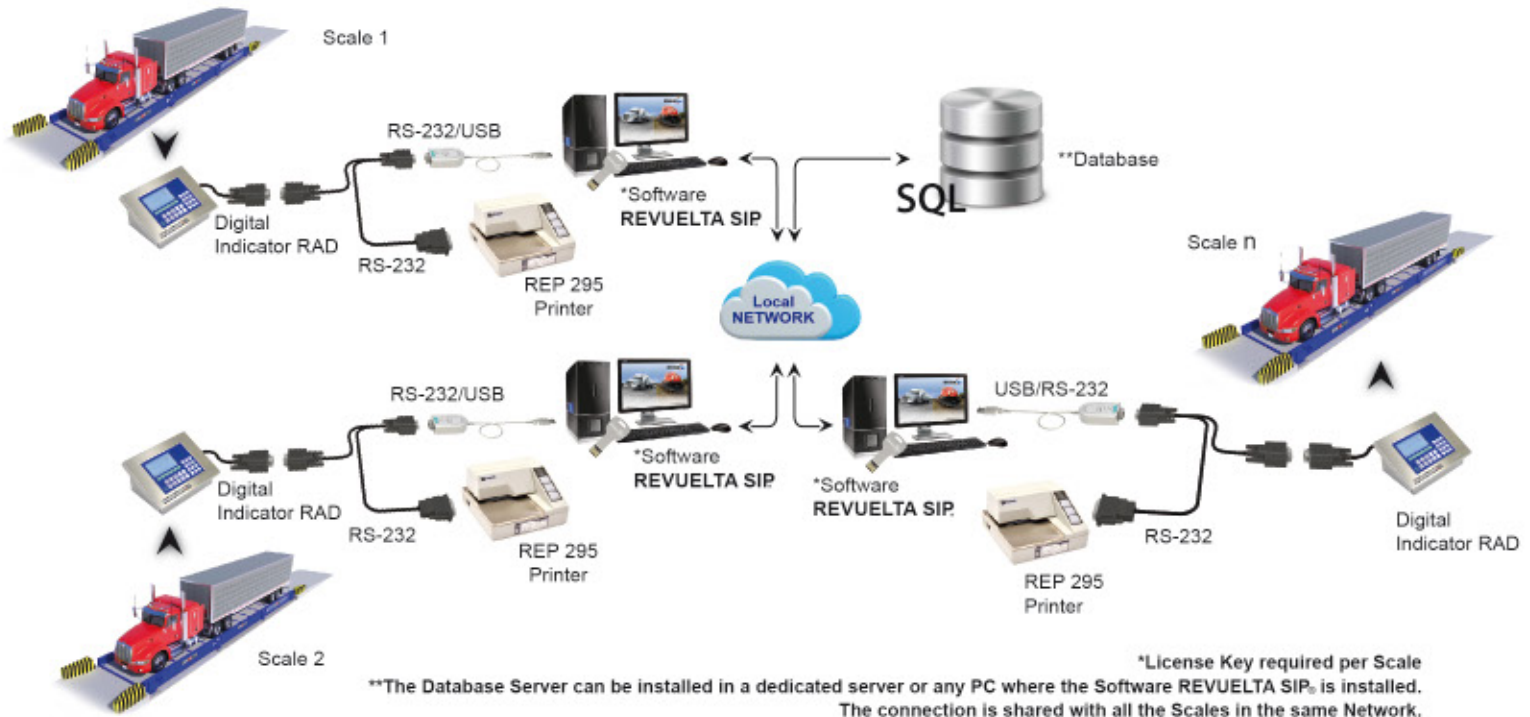

Compatible with Windows 8 and 10

BASCULAS REVUELTA® is a Mexican company with national and international presence with more than 59 years of experience in the weighing industry.

We are the leading brand in the fabrication and sales of industrial scales with more than 20,000 Truck Scales and over 600 Railroad Scales installed all over Latin America.

Multi-Scale System Connectivity diagram:

MINIMUM SYSTEM REQUIREMENTS

Processor:	Intel Pentium IV
RAM:	1 GB
Hard Disk Space:	50GB free HDD space
USB Ports:	1 USB for Scale communication 1 USB for License Key
Resolution:	1280 x 768 minimum display resolution
Operating System:	Windows XP w / Service Pack 3 Windows Vista Windows 7 Windows 8 Windows 10

Drives:	CD/DVD ROM
Network:	Internet connection highly recommended for Remote Support.

Branch offices in: Guadalajara, Monterrey, Ciudad de México, Hermosillo, Veracruz, Irapuato, Mérida.
Branch office Guatemala, CA. distributor in Central and South America.
